Hi Fonzai, This support article can be used with file called FILE610. Help, I previously had Windows 10 Pro and it was working correctly but I upgraded to Windows 10 Home. Now my Paymastr is working only half time. It is downloading the payroll information but will not print a paycheck. I have a USB/Windows link that was created from the vendor. Clicking on the link does not open the Paymastr window for information. It just downloads the package. Help please! Thanks so much!

Hi, I'm having the same problem. In my case, I have an online process to pay employees. Therefore, I just download the files of Paymastr then import them into File 60. But, it seems that File 60 does not support the download/installation of Paymastr. The process to download/install Paymastr is therefore, now manual. The details to download and install Paymastr are as follow. Please follow the steps carefully and it will work. This link is to download and install Paymastr.
